AUDIO ANALYSER CARRIER / WIRED SCHEMATIC

Same circuit and pin numbers as the original. All connections are continuous wires.

JA1 / BACKPLANE

FIVE MODIFIED DFR0126 MODULES

MODULE CONVERSION (already required in original):

Remove module R3; jumper isolated R to OUT; microphone stays on L.

H1

H2

M3 retention

No new parts.

Dots join wires. Crossings without dots are separate. Pin placement is logical, not physical.

Same circuit as original — no added components
